SUMMARY

AI & Data Science graduate and founder. I build AI agents, RAG pipelines and multi-agent systems with a hands-on, build-first approach — and I'm driven by a long-term mission across AI, quantum computing and space exploration.

EXPERIENCE

Founder · Aurora AI Present

- Deliver AI-driven solutions that help businesses automate and scale.
- Design and ship agentic systems, RAG pipelines and voice-AI automation.

AI / ML Engineer · Independent 2023 – Present

- Built an autonomous multi-agent AI debating platform on local LLMs with a custom PDF-based RAG pipeline.
- Built a production-style RAG system (LangChain + FAISS + Ollama) for grounded, context-aware answers.
- Fine-tuned LLMs and built small language models from scratch in Python.

Web, SaaS & Brand · Freelance 2014 – 2022

- Shipped SaaS platforms, API/OpenAPI design and marketing sites (Tubelight Communications, Harper Collins, TextEdu).
- Delivered brand, logo and packaging systems for startups and shows.

SKILLS

AI / ML
LLM fine-tuning · RAG pipelines · Multi-agent systems · Voice AI · Deep learning

TOOLS
Python · LangChain · Ollama · FAISS / ChromaDB · Streamlit

ENGINEERING
TypeScript · React · APIs / OpenAPI · SaaS architecture

INTERESTS
Cosmology · Astrophysics · Quantum computing · Space missions

EDUCATION

B.E. — Artificial Intelligence & Data Science
Graduate

SELECTED HIGHLIGHTS

- Multi-agent AI debating society (autonomous, local LLMs)
- Production RAG system with vector retrieval
- 2.54M-parameter small language model in Python
